

Test Ebook

Congratulations!

The fact that this ebook has opened on your screen suggests that you do not need to download anything to your computer to be able to read and print your ebooks.

While you are here, it might be good to practice saving files to your computer.

Go to **File > Save As** at the top left of your screen, and choose where on your computer you want to store your ebook. (Of course, there is no point in actually saving *this* ebook to your computer, because it has nothing in it!)

You could also test the print facility by clicking **File > Print** at the top left of your screen.
